

## Product Description

Prevent glass-lined vessel damage with a small innovation that aids in avoiding a potentially large problem. Only from De Dietrich Process Systems, a name you know and trust, comes the Safety Clamp. PART NUMBER: 100659

## FEATURES

- New design of the Safety Clamp will save you time and money.
- With the Safety Clamp you can “bank” thousands of dollars in repair costs and lost production time. Over time the Safety Clamp will pay for itself.
- The Safety Clamp cap has been specially devised to only unthread so far, and then stop, eliminating the potential for the clamp to separate into pieces.
- The clamp can be disengaged without removing the cap.
- The opportunity for a cap from a Clamp to cause damage to your vessel will no longer be a consideration.
- Specifically designed for manways that utilize a manway protection ring.
- Easy operation and implementation.
- Don't become a statistic: *“Over 85% of damage to glass-lined vessels is from mechanical destruction.”*
- Standard with stainless steel cap nut.

## BENEFITS

- Ability to eliminate the #1 cause of damage to glass-lined equipment.
- Implementation of an efficiently designed solution will prevent wasteful maintenance costs.

*The innovative Safety Clamp, a modified version of the standard two piece “J-Bolt Clamp”, designed for safety and efficiency.*
